

BEERBIND™

Technical Data Sheet

Beerbind™ is a specially formulated additive designed to mix with Beer Concrete Stain™ and densifiers/hardeners or in water. The result is a stained concrete surface that can receive dry polishing without removing substantial color under standard polishing techniques.

It is recommended to grind and polish up to 400 grit and then apply the Beer Concrete Stain™ mixed with Beerbind™ and densifier/hardener or water. After letting it dry for a minimum of 3 hours, it is ready to be dry polished. It is recommended to minimize the number of passes with the polishing machine to achieve best results.

The product should be stored at room temperature and not allowed to freeze. The shelf life is one year.

The product comes in a 2 ounce size that mixes with one gallon of densifier/hardener or water, and it also comes in a 10 oz size that mixes with 5 gallons of densifier/hardener or water.

Important notice to purchaser: You must evaluate and determine whether this product is suitable for your intended application.
